

# Case Study 2

Ms. Garcia is a 24 year old single Latina who self identifies as TG Female. She has been HIV positive for 3 years. She states she was discarded by family and friends 4 years ago because of her TG transition. She admits to only intermittent adherence to her ARV medication regiment, secondary to heroin use. She works 3 days a week at a local fast food restaurant. She states she is also a sex worker. She admits to physical abuse occurring during her work. She presents to the office with the chief complaints of anal warts, poor adherence and substance abuse.
