

Howard University College of Medicine Capitol Region Telehealth Project (HU CRTP)

HU CRTP Case Study for: December 3rd Webinar:

“Biomedical Prevention: Non Occupational Post Exposure Prophylaxis (nPEP) Guidelines” –
Part 1

Case Study

- Subject reports to an emergency room and states that he had just had receptive anal intercourse within 70 hours with his newly-seropositive partner and had engaged in numerous encounters with his partner over the last two months
- Subject tests negative by rapid test in the ER
- He request to start nPEP immediately.
